

Amendments to the Claims:**Listing of Claims:**

1. (Canceled).
2. (Canceled).
3. (Canceled).
4. (Canceled).
5. (Currently amended) The system of claim 18 wherein said ~~communication link means for communicating~~ is a postal connection or a telephone connection.
6. (Currently amended) The system of claim 4-18 wherein said remote station further comprises a scanner for scanning said pen and paper tests and a computer.
7. (Currently amended) The system of claim 6 wherein said ~~communication interface means for communicating~~ comprises an Internet connection for establishing a communication path between said computer of said remote station and said diagnostic station.
8. (Previously presented) The system of claim 18 wherein said auditory assessment component includes an interactive voice response system.
9. (Currently amended) The system of claim 8 wherein said ~~communication interface means for communicating~~ comprises a telephone communication network connecting said audio assessment component to said diagnostic station.
10. (Currently amended) The system of claim 8 wherein said ~~communication network means for communicating~~ comprises an Internet connection between a computer of said interactive voice responsive system and said diagnostic station.
11. (Previously presented) The system of claim 18 wherein said diagnostic station further comprises means for generating a report of an assessment of a user of the system based on said visual assessment component and said auditory assessment component.
12. (Canceled).
13. (Canceled).
14. (Canceled).
15. (Canceled).
16. (Canceled).

17. (Canceled).

18. (Currently amended) A system for providing a prescreening assessment for identifying possible learning disabilities comprising:

a remote station;

a visual assessment component and an auditory assessment component at said remote station, said visual assessment component providing testing of visual motor skills for evaluating learning disabilities in visual components and said auditory assessment component providing testing of auditory skills for evaluating learning disabilities in auditory components, said video assessment component comprises writing answers to questions or preparing drawings, said auditory assessment component comprises one or more tests selected from the group consisting of testing auditory discrimination and testing of auditory memory;

means for communicating first information of said visual assessment component and second information of said auditory assessment component to a diagnostic station; and

preparing at said diagnostic station an assessment of learning disabilities based on said first information and said second information.

19. (New) The system of claim 18 further comprising:

means for recording auditory responses of said one or more tests, said auditory assessment component being communicated by retrieving said auditory responses.

20. (New) The system of claim 18 wherein said visual assessment component comprises a diagnostic test.

21. (Canceled).
